M-VIT 4000 – the rugged, ultra compact high speed camera

- **High-G-rated for up to 200g and taking 4000 fps, ready to be used in the most severe environments.**
- **A robust high resolution camera for demanding applications in research and development.**

M-VIT is particularly suited for all applications where a compact, portable, high resolution and robust camera with extra speed is essential. The highly light-sensitive sensor covers the most ambitious application. The M-VIT is designed and certified to withstand G-forces in excess of 150g/10ms all axes and spikes of up to 200g without CFast option. Offering a wide range of signals for external control or feedback on camera status during tests, the M-VIT is a genuine all-in-one-camera.

Built-in non volatile 64GB flash memory automatically saves a copy of each live recording for data redundancy, this is crucial for critical tests that cannot be repeated. To round it all up, the comprehensive Imaging Studio software allows easy piloting from PC, laptop or tablet PC.
